

CHART 8550

Stream No. 3. (1 notice) Behind Fairmount Island.

Is 9 feet wide and 6 inches deep.

Has a coarse gravel and boulder bottom. It is about $\frac{1}{2}$ mile long
and connects with a lake which has some good spawning shore.
Lake covers an area of about 40 acres.

There is a falls in stream about $\frac{1}{2}$ mile up. It doesn't seem like
it should stop the fish, but we found none above there.

September 8, 1926.....65 reds and 400 humps spawned here.

1927.....no visit. Allowance made.

September 17, 1928.....353 humps and 200 cohes; also 2 reds.

1929 allowance.....400.

1930 allowance.....1,000.
